

## CONVEYOR SYSTEMS

**Designed to make the unloading of vehicles as smooth and as easy as possible, Sovex can supply and manufacture tailored conveyor systems to meet your company's exact needs.**

We offer three conveyor system basic models: Powered Rollers, Belt Conveyors and Gravity Rollers. Each can be flexibly built and adjusted to fit your individual requirements.

Whatever your needs, Sovex can provide the ideal solution to your problem.

### POWERED ROLLERS

Lineshaft powered rollers – offer an efficient and economical solution to conveying, with a firm base driven from a rotating shaft under the rollers.

Belt under rollers – are a flexible alternative solution to lineshaft powered rollers.

Positive driven rollers – are driven directly from a motor or gearbox, for heavier loads.

All of our conveyors are supplied in modular form to make installation easy, and to offer added flexibility for extending the system in the future. Each conveyor comes in a range of possible widths to best suit your needs.

We can also provide extra parts - including corners, bends, merges, gate sections, transfers and accumulation and stops, to maximise the functionality of your conveyor.

providing the ideal solution  
to your problem

## **BELT CONVEYOR**

Sovex belt driven conveyors offer an ideal solution to horizontal or inclined product transfer.

We offer a range of belt finishes including smooth and grip top belts for standard handling requirements, fire retardant, ribbed, food quality, and those weaved for special applications.

## **GRAVITY ROLLERS**

Whatever you want to move, gravity conveyors can get it there with minimum effort. Gravity conveyors are an ideal solution for product movement where space is tight and can be easily moved.

Gravity conveyors can be manufactured to the same specifications as the lineshaft with either plastic or steel rollers, and can create a total goods movement system.

We offer rental on conveyor systems which is a cost-effective solution for meeting peak or seasonal demand. We can also make static or mobile vehicle loaders available on short or long term loan.

Sovex offer full technical support on all unit purchases or rentals. All of our equipment is also covered by our maintenance agreement and includes periodic services, free of charge. Breakdown cover is also included for normal wear and tear.

At Sovex, we look forward to meeting your needs; keeping your business moving.
